# REVOZPORT 1 M RAZE

The RevoZport 1M Raze is focused on the enhancement of the already stellar BMW 1 Series M, further improving its power-to-weight ratio and aerodynamic efficiency.

All products are designed on the premise that form should follow function. Weight reduction is the main priority with a total weight reduction of 60kg achieved through the extensive use of carbon composite fibre products. The 1M Raze is the ultimate combination of performance, style and handling.

Design Concept

# Aerodynamics

---

The 1M Raze is focused on Weight Reduction and Aerodynamics.

All components were painstakingly designed by a team of engineers and designers to ensure that they are not only aesthetically pleasing, but also reduce weight and improve aerodynamic function.

## Weight Reduction

---

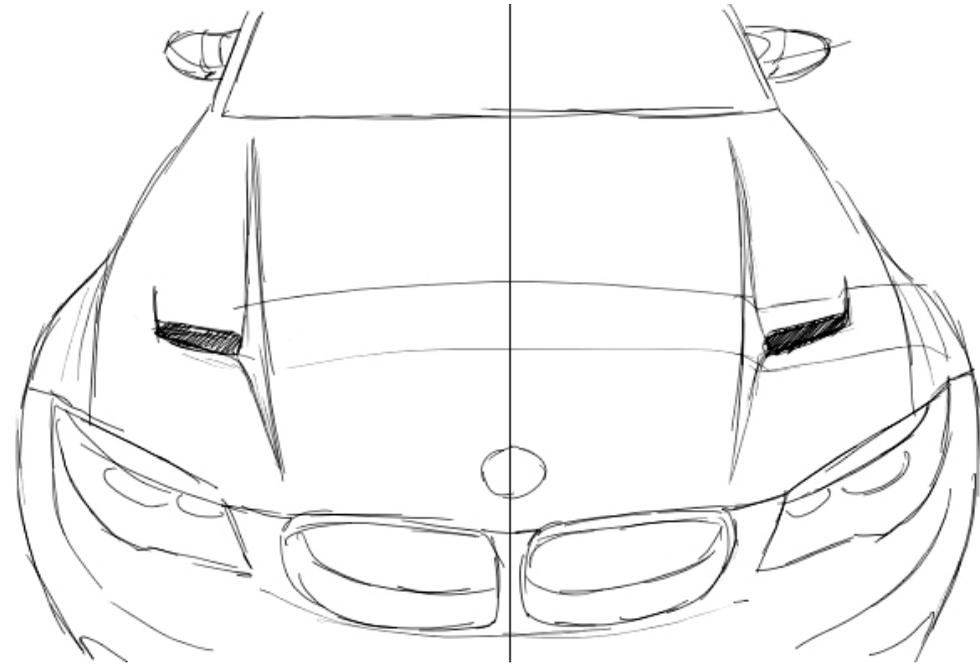

Power to weight ratio directly determines a sports car performance. When weight is reduced, speed, brake, lateral and longitude G force are all improved dramatically.

The 1M RAZE manage to trim more than 60kg on a 1570kg \* 340hp car, a very significant increase.

\* Figures quoted include a 90% tank filling, 68kg for the driver and 7kg for luggage. Unladen weight applies to vehicles with standard specification.

## Cooling Importance

---

For any high performance cars, cooling is as important as good braking.

The 1M RAZE Front Splitter and Bonnet is exactly designed for both aerodynamic and cooling effect.

## E 8 2 Interior Door Cards

---

Give your car an exotic, customized interior, with our high quality carbon fibre door cards. They feature the same high grade carbon weave as our other carbon components with a beautiful high gloss clear coat and fitment that is spot on.

Optional : Alcantara and Color Stitching available

## E 8 2 Carbon Interior Kit

---

The 6pcs interior add-on kit is made with a very thin layer of genuine carbon fibre by vacuum infusion. It is designed to perfectly snap on top of your original trims and immediately turn the interior to the most exotic feel.

Material: Vacuum infused carbon fibre in Gloss finishing or Matt Carbon

EU REVOZPORT

## Front Grills

---

Carbon Front Kidney Grills are available in both "Insert type" or "Replacement type". The inserts directly snap on to the original grill rings perfectly.

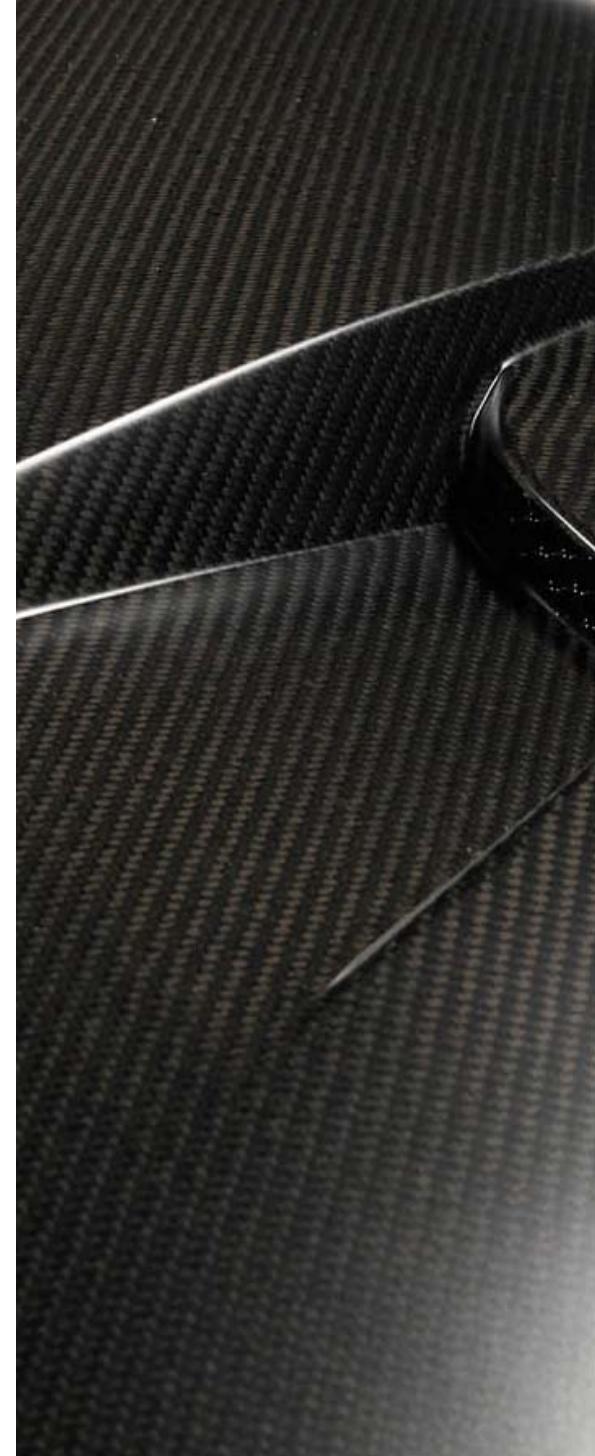

## Light weight Vented Bonnet

---

1M RAZE Lightweight carbon bonnet is approx. 14 KG lighter than stock with fully functional integrated cooling vents that allow hot air to escape while feeding cooler air into your cold-air intake, allowing your engine to perform cooler and more efficiently.

Material: Vacuum infused carbon fibre in Gloss finishing or Matt Carbon

## Front Splitter

---

Designed to increase frontal down-force, improving stability at speed. Integrated brake cooling ducts enhance brake operation under hard use by channeling cool air directly onto the brake rotors. The smooth sweeping design is also beautiful to behold.

The lower adjustable splitter gives additional downforce when desire or can be completely remove for better ground clearance.

Material: Vacuum infused carbon fibre in Gloss finishing or Matt Carbon

# Front Splitter Brake Duct Kit

---

This brake cooling duct kit is designed to adapt to the 1M Raze front splitter to efficiently direct fresh cool air directly to the brake disc.

# Mirror Cover

---

Carbon Mirror Cover is available in both insert add-on or direct replacement version. The direct replacement version ensure 100% perfect fitment as it is an original laminated product.

Material: Vacuum infused carbon fibre in Gloss finishing or Matt Carbon

## Side Skirt

---

The 1M Raze carbon composite side skirts not only look fantastic but were designed to prevent air from rolling under the sides of your car and actually compliment the BMW air-curtain design.

The rear fender upskirts provide a 15mm wider width to compliment the unique 1 series M wide track design.

Material: Vacuum infused carbon fibre in Gloss finishing or Matt Carbon

## Trunk Lip Spoiler

---

A more aggressive ducktail lip spoiler complimenting to the 1M aerodynamic design.

## 1 M Raze Rear Diffuser

---

The 1M Raze rear diffuser has fins that extend out from the rear bumper to smooth and channel air flow from under the car into the low pressure area behind your vehicle as it moves at higher speeds. In concert with other aerodynamic components, our diffuser results in more stability and higher speeds and cooling effect to the rear differential and exhaust muffler.

## Light weight Trunk

---

Our light weight trunk sheds 10kg over the heavy OEM steel trunk and its perfect fitment and race inspired look is the perfect way to improve your power-to-weight ratio with the style that sets your car apart.

## GT Spoiler with mount

---

The 1M Raze GT Spoiler is adjustable for different downforce settings. It helps reduce rear lift while braking and also provide high downforce during high speed cornering. A must for serious weekend racers.

Material: Vacuum infused carbon fibre in Gloss finishing or Matt Carbon

EU REVOZPORT

M-SPORT

## 1 M Raze Roof Spoiler

---

Not merely a cool looking add-on, the 1M Raze roof spoiler is designed to smooth airflow over the roofline which reduces drag, which can make your car smoother at speed and even improve fuel efficiency.

## 1 M Raze Lightweight Roof Panel

---

Like the M3 CSL and E92 M3, the roof is replaced with carbon fibre because it is the highest point of a car and reducing weight is essential to help cornering and lateral G force. Cars with sunroof can easily weight over 20kg at the highest point. The extra weight creates bodyroll and stress to both suspension and tires.

## The 1M Raze Cat-Back Titanium Exhaust system

The 1M Raze Cat-Back Titanium Exhaust system is made with TP340C Titanium from Japan and weigh approx 7kg only. It produce a throaty sound while providing a free flow system without compromising back pressure for low end torque.

An optional straight through mid-pipe is available as a no cost option. It gives an extra 5-7 hp, perfect for track and race purpose.

## Titanium Exhaust

Original Stainless Steel System : 24 kg approx.  
Revozport Titanium System : 7 kg approx.

# 1M RAZE Sema

BMW creates the ultimate driving machines, no doubt - but its limited to what a manufacturer can run on the road and often compromised with cost and comfort.

We are now introducing the 1M RAZE P450 performance package for the BMW 1M vehicles. A complete setup featuring a full power package engineered and manufactured by Custom Performance Engineering and a full carbon fiber outfit for weight reduction by RevoZport. The result - 450whp and over 130lbs in weight reduction. Unveiling the fully outfitted BMW 1M vehicle at SEMA 2011 - we are proud to give the 1M owners a little something more with which to push their cars to the limit in the real M fashion. The SEMA vehicle dubbed the "Black Knight".

For more information please visit [www.revozport.com/1m-raze](http://www.revozport.com/1m-raze)

Full details following release at SEMA 2011

1M Raze P-450 Kit:

- cp-e upgraded front mount intercooler
- cp-e charge pipe w Tial blow off valve
- cp-e dual cone air intake
- cp-e catless down pipes
- cp-e full-race exhaust
- Alcohol Injection Systems trunk mounted meth-injection system
- Custom engine and fuel management tune

## About Us

RevoZport Racing Technology Ltd.

- design and produce our own Automotive and Lifestyle product line. It is primarily focused in performance and styling accessories for vehicles like Porsche, Ferrari, Lotus, Lamborghini, BMW, AMG etc. Our design studio is located in UK with designers from Europe continuously developing new products for RevoZport and customers around the world.

RevoZport Manufacturing Ltd.

- is the manufacturing arm of RevoZport. It focused in the production of Composite fibre products for OEM, ODM and our own designed products. The factory is based in Guandong province of the PRC and equipped with the latest carbon curing technology for our highly demanding customers.

On June, 2012. Revozport is proud to announce the success in achieving Asia's first automotive & lifestyle composite product with design and production to become fully ISO 9001:2008 certified by both SGS & TUV SUD at the same time.

This news confirms that Revozport has been officially audited by the two most stringent certification body and proves that Revozport have met all the quality and management criteria of this bestowed internationally recognised standard.

Revozport is Asia 1st composite product with design and production capability to achieve ISO 9001:2008 and certified by both SGS and TUV Sud. To achieve ISO 9001 status Revozport demonstrated to SGS & TUV Sud that we have rigid quality management systems in place, including technical training, quality control management and thorough staff training for new product development and implementation.

It is clear that Revozport will become the natural choice of composite products in the near future.
